¹ All the figures are calculated according to the [Zero Waste Plan - guidance for local authorities](#)

² Household waste is waste generated by households (see full definition in par 1.2 of the Zero Waste Plan - guidance for local authorities).

³ Other waste diverted from landfill is the fate of waste material not reused, recycled or landfilled. It includes household waste treated by incineration, mechanical biological and heat treatment. It also includes any Incinerator Bottom Ash and Metals recycled as a result of treatment, and excludes the residue from incineration which is landfilled. It also includes any weight loss during the treatment process. It does not include temporary storage of treated waste pending a recycling or disposal market.

⁴ Includes household waste disposed of instead of being recycled and residues from incineration that are landfilled.

* Treated waste sent to interim storage pending a recycling or disposal market. More waste will be recorded as generated than managed.

** Treated waste sent from interim storage to final recycling or disposal. More waste will be recorded as managed than generated.

Please note local authorities report the management of waste in the same period when that waste is collected to avoid discrepancies with the total waste generated and managed. The figures are accurate at the time of publication. However the data may be updated if further revisions are necessary.
